Here they show up in slideshow form.

To see the photo in full size, click on the expand icon that appears in the bottom right corner of the image.

You can click through the slideshow by using the arrow buttons.

## VIDEOS

You can upload a video in several file formats – Mpeg, Quicktime, X-Flv, X-Msvideo, and YouTube.

The easiest way to upload and share videos is to use YouTube. Simply upload the video to YouTube and use the URL or embed code to upload the video to BDL.

For this example, I'm going to use the YouTube URL.

Copy the URL from the "share" section under the video that you've uploaded to YouTube.

Then go back to the project you are working on.

You can go back to the project library by clicking on "Projects" at the top of the screen or the "Ecosystem Projects" icon on the homepage.

Under the "organize" tab, you need to choose a type and subtype based on the type of video you're uploading.

I pasted an embed code of a YouTube video, so I'll choose a "Video/YouTube" under type and "video" under subtype.

A box will appear confirming the upload. Click, "view" to go to the video.

The video opens up to the "Recent Activity" tab. Click on the "Images/Video" tab to view the video.

Now to add this video to a project, hover over the TOOLS menu and choose, "Add to Basket."

Then go to the project you are working on.

Once you are in the project, hover over the TOOLS menu and choose, "Empty Basket Here."

Click on the "Images/Video" tab of the project and the video should be there.

You successfully added a video to your project page.

This concludes the "Add Documents, Photos, and Videos to Projects" tutorial.
